GLEICHEN, ALBERTA, WEDNESDAY NOVEMBER 1, 1933

SUBSCRIPTION \$2.00 PER YEAR

NOTES WONDERFUL IMPROVEMENT AT INDIAN MINES

(By John Giambeck)

Last week I went to the Indian coal mine, south of Cluny, the first trip in several years, or since the new system was put in operation and to say the least, I had the surprise of my life. I had never dreamed that I would live to see such modern methods adopted in an Indian mine.

How well do I remember the old homestead days when the mines only ran after freeze up. How a few little mines, run by the Indians, using the most primitive methods, were carried on. When we often had to lay around all day to get a haul of coal or often went back home with-out one. How we used to position the Indian agent to have the mines leased to some white man and run in a more business like manner, only to be told that nothing could be done, that the coal belonged to the Indians and if they chose to run things the way they did, well that was their business.

The first thing I noticed was the grading of a fine road to the mine and doing away with that awful little coaler hill at the entrance to the flat below, which used to be a real nightmare to the horses when the road was slippery. When I arrived at the mine I found six big trucks and about a dozen four-wheel teams ahead of me, which in the old days would have taken a week to load. But, believe me, the coal was shot out to the wagons and trucks in such a steady stream that I got loaded and away from the mine before noon.

It was a sight to see an army of stamping big young Indian miners, guileless mining lamps in their caps when work started and it was good to view the long lines of coal cars run out and dumped into the big box cars as the wagons could take it away. Who ever put this new system into operation deserves much credit and it is a great thing for all the surrounding farmers to be able to drive to this mine and get good coal reasonably cheap and receive good accommodations.

That Indian mine is one place where there is no depression, and I noticed quite a few well built long houses around in the bush and a brand new bungalow, a little ways off from the mine, probably built for the superintendent, or whatever the man is called who has charge of the mine. I also noticed a great number of Indian tents, and it looked as if half the reserve Indians were living in the woods.

I could not help compare the white farmers waiting to get loaded up who after many years had pioneered now find themselves in such a plight that it keeps them scratching to have enough money for their winter's coal with these young Indians who find coal and wood, with no means well fed and clothed, with no loans about mortgages and debts, with plenty of work and good pay.

As I went around the mine, at this time of the year, during these weeks of wonderful October Alberta weather are beautiful to look at, in their many fine colors and I thought how I could be an Indian, living in these beautiful surroundings, carefree and happy, instead of being a worried white man wondering how long present conditions are going to last.

WILL TAKE WHEAT ON SUBSCRIPTION

The call will accept payment for 25 bushels of wheat at the rate of 25¢ per bushel. That is, three bushels of No. 1 or No. 2 wheat will pay a year's subscription. This policy covers growers and subscribers and applies to bona-fide farmers in any part of the province. The wheat may be delivered to any elevator with a grain ticket made out in the name of The Gleaner Club and presented to The Call for credit. This exchange will be in force until definitely renewed. All farmers wishing to take advantage of it are requested to do so as early as possible during the grain marketing period.

HOCKEY CLUB HAVE REGULAR BUSINESS MEETING

A meeting of the Gleichen Hockey Club was held last week in the Bank of Commerce, with some 25 fans and players in attendance. The financial statement showed the club's debt greatly reduced and with enough cash on hand to start the season.

It was stated at the meeting that J. Roberts, the regular goalie was now located near Vulcan and would likely play there this winter. However, the secretary was instructed to go in touch with Jack and find out just what his intentions are, and if he is going to play with the southern team.

The question of playing senior hockey with Calgary and Drumheller this winter came up but was left over to be settled later. Don Johnston was elected manager. Don Johnston was elected manager. Don Johnston was elected manager.

President MacIsaac was appointed official delegate to attend the annual meeting of the Alberta Amateur Hockey Association, at Calgary, November 11th. The meeting also decided to send Bob Brown and Tom Johnston with Mr. Black, to help in any way they can as advisors.

OBITUARY

MRS. SUSAN BROWN

Mrs. Susan Brown, an old timer of the Queenstown district, died at the home of her daughter Mrs. J. B. Wilson, Calgary, at the age of 8 years. Friday evening. She was born in Laurenceville, Rhode Island.

Mrs. Brown with her husband and family arrived in Queenstown, from Scotland, in 1884, and resided there continuously until about a year ago when she moved to Calgary to live with her daughter, Mrs. J. Wilson. When Mrs. Brown went to Calgary last year it was the first time she had ever seen the city.

The remains were taken to McLeod Hall Sunday for burial beside her husband who died some years ago. Five daughters, Mrs. Wilson, Calgary; Miss Susan E. Brown, Queenstown; Mrs. L. A. Bishop, Medicine Hat; Mrs. C. A. Miller, Pipe, Sask.; and Mrs. C. Hodkin, Queenstown; and two sons, David A. and Austin C. also of Queenstown, survive.

DOCTOR PRAISES PRESS

In the opinion of an eminent cancer specialist, the newspapers of the country are performing a splendid public service through the publication of health information.

He declares that due to the spread of sound information concerning the teeth, excessive use of stimulants and tobacco, 70 per cent of the patients threatened with cancer now seek medical aid in time to save themselves from actual infection. Before the newspapers aided in disseminating health information, less than 3 per cent sought medical aid in time.

The old idea that a doctor should not give out information to the press, because of an ancient code of ethics, was criticized by the doctor who believes that the public should be told in plain language whatever of benefit the medical man has to tell. Stressing the importance of attention to the teeth, the doctor said:

"Let the press continue to work. Let it advise every man and woman over 40 to have their teeth X-rayed twice a year. Bad teeth are the most common cause of cancer." Though preventive measures the span of human life has been materially lengthened during the past few years, and it is gratifying to newspaper men to have the commendation of such high authority for their part in bringing about this important result.

From Houscar, come reports of a species of mice equipped with pockets in which to carry food. The fact that mice have discovered a use for pockets is thought to foreshadow a similar discovery on the part of human beings.

NOTED RUSSIAN TO SPEAK HERE FRIDAY NIGHT

Arrangements are now completed for the visit of Count Nicholas Ignatieff, former Russian noblemen, who will deliver a lecture, entitled "The New Canada," at the Gleichen Community Hall, on Friday night, Nov. 3rd under the auspices of the Canadian Club.

Count Ignatieff is today the foremost authority on Russia and is already well known by his writings in Canadian periodicals and by his talks, though he has only been here a few years.

He and his family, holding a high place in the councils of the Czarist regime came to grief under the Communists and emigrated to Canada. He started at the bottom here by working in the woods, but now he knows Canada better than the most of us do.

Count Ignatieff, who now resides in Toronto has made Canada his home. He is the type of foreigner the Dominion needs, for he is making an intensive study of this country as a part of his life work. The Count spent many weeks in the Peace River country during the past summer, studying conditions.

Wherever the count has addressed audiences in Canada, he has been enthusiastically received by his hearers. He stands well over six feet and possesses a striking personality, and is aid to have a splendid command of the English language.

The meeting is open to the public, when it is expected there will be a large attendance.

The Gleichen Orchestra will also attend selections and to those who have not heard the orchestra it can be said they are a first-class evening's entertainment in themselves.

The only charge will be a collection at the door.

THE NEXT GENERATION

The next generation will talk about when they used to heat houses with coal stoves, when they used railroads and automobiles for travelling from one place to another; when the women wore dresses and men wore hats; when people went to church some times twice a Sunday; when dad and mother used to have some say about what their children did, not where they went, how one had to go to a store to buy what they wanted; how there were what they called Red and Charitable Institutions; when there were what was known as military stores; when a doctor had to be called when anyone was sick, and when they had to prepare three meals a day. Yes and they talk about those old fashioned radios and telephones, and about banks where they kept their money, and how the farmers had to milk cows, keep horses, and fill barns. The pity is that some of us will be here to see how really funny the present generation will appear in the eyes of the inhabitants of the great old world a hundred years hence.

Regarding on with the progress of the town, and accompanying the many features of its modern improvements, have been the presence, all these years of old-time conditions bearing in their face a serious menace to the safety of property and all which stand the backyards of so many of our old dwellings used in years gone by for stables, barns and outbuildings, once indispensable, but now totally useless for any purpose whatever. A look into old backyards of many of the residences of this town will prove that of part of the town and at the same time show the uselessness of the structures. It is manifest that they should be torn down and the houses removed.

The local Liberals announce that on Thursday evening, November 22nd, R. W. Houscar, the Liberal leader for Alberta will address a public meeting in the interests of the Liberals at the Gleichen Community Hall, at 8 p.m.

Poppy Day will be next Saturday, November 24th.

MIDGET HOCKEY CLUB ELECT NEW OFFICERS

A meeting of the Midget Hockey Club was held in the Club Room of the Community Hall on Thursday evening of last week at 8 p.m.

The following officers were elected:

President, S. E. Loster.
Vice-President, W. J. McKay.
Secretary-Treasurer, M. W. Murray Jr.

Manager, Milton Desjardins.
Coach, Bob Brown.

The secretary submitted the financial statement of the club which showed a balance in the bank of \$44.00. Milton Desjardins was authorized to get new sweaters. The old sweaters are to be handed over to the Rink Club.

It was decided to enter the Juvenile Playdowns and Bob Brown, to find out regarding the details about entering in this competition.

The club will be known in future as the "Gleichen Hockey Aces." St. McKay was authorized to see the rink company regarding hockey practice hours for the club.

The Midget Hockey Club wish to thank the people of Gleichen for their support in the past and respectfully solicit for their support in the future as they intend to take part in the juvenile playdowns.

UNITED CHURCH FOWL SUPPER FRIDAY EVENING

The annual fowl supper prepared by the ladies of the United Church will be ready for you in the Gleichen Community Hall, Friday, Nov. 3rd, from 6.30 to 7.30 p.m. The supper will be followed in the same hall by a Canadian Club meeting open to the public at which Count Nicholas Ignatieff is to be the speaker. Music by the Gleichen Symphony Orchestra will add to the enjoyment of the entire evening.

THE PENSION ROLL

Even statistics are sometimes interesting, and to those who do not happen to be familiar with Uncle Sam's pension roll the latest report on federal pensioners, soldiers and their widows, will be informing at least. Here are the figures:

War of 1812—Widows 11.
Mexican War—Widows, 725.
Indian Wars—Soldiers, 5,575; widows, 4,033.
Civil War—Soldiers 57,056; widows, 104,223.
War of 1812—Widows, 178-568; widows, 28,882.

A striking item in this report is the fact that there are 11 widows of men who fought in the War of 1812 still alive and drawing pensions. The last survivor of the Mexican war died not long ago. Practically all living veterans of the War with Spain are now on the pension roll. All of which illustrates once more that besides its other horrors war is terribly expensive—before, during and after.

The vote on the beer question in Armstrong resulted in a win for the drys. 40 votes were cast in favor of beer license and 46 against. There were 7 spoiled ballots.

COMING EVENTS

Nov. 4—Annual Poppy Day.
Nov. 3—Annual United Church fowl supper in Comm. Hall.

Nov. 10—Annual meeting Meadowbrook Hall, dance and supper free.

Nov. 10—Annual Armistice dance in Gleichen Comm. Hall.

Nov. 18—St. Andrew's Church annual sale.

Nov. 22—Tombola and dance by the C.W.L. in the Meadowbrook Hall.

Nov. 23—R. W. Houscar Alberta Liberal leader, address in Gleichen Community Hall.

Nov. 27—Meadowbrook hockey club dance at Meadowbrook.

Dec. 2—Annual Xmas bazaar of W. A. United Church.

MOTORISTS PETITION FOR CHANGE IN LICENSE YEAR

In an effort to have the Alberta government declare the auto license year to be from April 1st to March 31st instead of from January 1 to December 31, at present, the Alberta Motor Association will shortly send all over Alberta copies of a petition to be presented to Hon. W. L. Auld, Lieutenant-Governor of Alberta.

The petition will be placed in 5,000 garages, service stations and auto accessory stores throughout the province to be signed by auto owners. A delegation of prominent motor association officials will present the petition. Circulation of the petition will start at once.

"Far more cars will be in operation throughout the year if the date for securing license plates is set back until April 1st," officials said in a statement following the meeting.

"Usually, early in the new year, motorists are unable to secure his license, and waits until spring returns before bringing out his car. During the interval, the car has been idle, representing a loss to all oil and gasoline dealers, auto garages and service stations, and to the community as a whole."

"If, however, he may not secure his license until the first day of April, he may run his car throughout the winter. This means that the months of January, February and March would see as many cars in use as do June, July and other summer months. Then too, the government would not need to reduce price of licenses as they did last year, a decrease which caused much confusion. With a new license year starting on April 1, the motorist public sees the community would jointly benefit."

The petition reads as follows: "To His Honor the Lieutenant-Governor of the Province of Alberta in Council.

"The petition of the undersigned humbly sheweth:

"That the annual license fee for motor vehicles becomes due and payable on the first day of January of each year.

"That there are many inconveniences for owners to cars operating motor vehicles and avoid the necessity of disbursing license fees at the time resulting in a loss of revenue from the gasoline tax loss of business to those servicing motor vehicles and inconvenience to owners all of which could be avoided and overcome by the alteration of the license year so that licenses become payable on April 1 each year in lieu of January 1.

"Wherefore your petitioners humbly pray that Your Honor may be pleased to alter the license year from January 1 to April 1 each year.

"And, as in duty bound, your petitioners will ever pray. Dated this 25th day of October, 1933."

A. V. Cooke spent several days last week in Calgary. He was called up for jury duty.

Attacks on Hudson Bay Route

Some fairly strong language is indulged in by the Financial Post of Toronto in its opposition to the Hudson Bay Railway, and in support of a demand made by it that the route be abandoned. A recent attack by the Financial Post on this western outlet for western products may well be quoted: It says:

"The colossal failure of that notorious contractor's racket, the Hudson Bay Railway, was bluntly demonstrated last year when the Government had to provide free storage in the Churchill elevator to induce any grain at all to move out over the route."

"An equally forcible demonstration of the present uneconomic character of the route has been provided this year. The Government announced an intention of charging the regular tolls at the elevator, tolls which were the lowest of those imposed by Government order at any elevators throughout Canada. No grain was offered for shipment. Even the grain growing interests of Western Canada, who had for two generations advocated the opening of the Bay route in order to reduce their costs of shipping grain to Europe, refused to ship grain; they knew that the established route via the Great Lakes and the Pacific Coast were more economical."

"Political pressure was brought on the Government to repeat the satire of last year when a pretence of success of the route was made. It was finally decided to reduce storage rates at Port Churchill from the usual figure of almost one cent a month to the ridiculously low figure of one cent for the whole period from now to the end of August next. This had the effect of paying a cash bonus out of the Dominion treasury to those who would drive grain at Churchill. Now the elevator has been filled up. On-the-by-the-Churchill can declare that the route is a success. But the taxpayer is paying a heavy bill for this child's play. If Ottawa made the terms attractive enough there would be people willing to load grain in bags and canoes it the Mackenzie River to the Arctic Ocean and then to fly it over the north pole to continental markets."

"The country would be infinitely better off and taxation could be reduced if the route were completely abandoned and the expensive attempts to drive traffic to use it were abandoned."

"The Hudson Bay route is not a business enterprise but a hybrid of a white elephant and a political sacred cow. As such it has the 'protection' of political leaders of both parties, their eyes cocked to the western vote in the next election."

"But the huge losses add the charge for the bonus to favored grain operators who have been paid to use the route are a big item in every tax payment made by every citizen."

The argument of the Financial Post is simply this—that it would be better and cheaper to abandon the route, leave the elevator at Churchill empty, than to fill it up with grain on which \$20,000 in storage charges will be paid. How, it may be asked, is an empty elevator to cost the taxpayer less than a full one?

The Hudson Bay route is a new route. It is in its infancy, and it has been thrown open to traffic at a time of the greatest trade depression in the history of the world. It must, and will, be given a fair chance to prove itself.

How many scores of millions were poured out by the Government of Canada for years, and how many concessions were granted, to demonstrate to the shipping world the feasibility of an ocean port at Montreal, a thousand miles inland from the sea, and located on a river that is ice-bound half the year? How many more millions have been poured out to create a harbor at Toronto, and upon canals at St. Lawrence, and along the St. Lawrence, in order that upper lakes shipping might get to Toronto and Montreal? The Financial Post does not object to these millions being spent to benefit the Eastern shipping route, but it yells like murder because a mere fraction of the same is expended is now spent on a purely Western route.

It is Government expenditures, for which Western people are taxed as well as the people of East, that made the port of Montreal and provided the harbors for Toronto. Had these expenditures not been made, and had the Government not mended these routes in their experimental stages, the development of today would never have been reached.

Toronto's financial paper opposed the Hudson Bay route from its inception. The first line of attack was that successful commercial navigation of Hudson Bay and Straits was an impossibility. That theory was exploded, and the feasibility of the route was demonstrated. The Financial Post now conditions which have resulted in a rate war on the Great Lakes and the lowering of rates to such a point that it is cheaper, for the time being, to ship by that route than through Churchill. Toronto demands the abandonment of the Western routes. The Financial Post does not object to these millions being spent to benefit the Eastern shipping route, but it yells like murder because a mere fraction of the same is expended is now spent on a purely Western route.

The last blot on leave Churchill, and it will be the tenth since the war, will carry a cargo consisting of some hundreds of thousands of bushels of wheat, hundreds of head of Western cattle, 30 tons of Saskatchewan produced honey, four carloads containing 150,000 feet of Saskatchewan spruce lumber. This will be the first time Saskatchewan lumber has been shipped to England by any route, and the first time either honey or cattle have gone out via Churchill. All of which goes to prove the statement that the route is only in its infancy.

The Financial Post has always professed to believe in Government protection for infant industries. Let it be fair and give this line Western infant a chance to live and given that it will thrive and grow. Possibly the heart is that the industry which the Toronto financial paper represents does not want it to thrive and grow. Our prediction is, nevertheless, that it must succeed while.

Survivor of Lucknow
Oldest living survivor of the siege of Lucknow, Charles George Palmer, of Dunbar, B.C., was still quite hale and hearty on his 86th birthday, which he celebrated by an elaborate party. Mr. Palmer was not quite 10 years old when the siege, the historic incident in the Indian mutiny, occurred in September, 1857. Only eight other survivors of the siege are alive.

A friend of that Duke of Devonshire who died in 1908 once told him that really he must not have in the middle of his own species, and the Duke replied: "My dear fellow, you have no idea how dull they are."

Chile will tax those benefiting from the tourist trade and will use the funds to attract more visitors.

Weakening Diarrhoea Dangerous Dysentery

Diarrhoea and Dysentery do not need to run for any length of time until the whole system is weakened and debilitated. Every other disease so quickly undermines the system and leaves the patient a collection of prostration and often collapse.

Fowler's Extract of Wild Strawberry is not only a powerful and effective in checking the progress of the disease, but at the same time it stimulates, stimulates the system by an invigorating tonic.

Never be without a bottle of Dr. Fowler's. Always keep a supply on hand. Manufactured only by The T. Millers Co., Limited, Toronto, Ont.

Inventor's Grave Marked

Monument to Canadian Who Evolved Process of Kerosene

An inconspicuous stoneware grave in Camp Hill cemetery at Halifax, Nova Scotia, has been marked by one of the huge oil companies in the final resting place of Abraham Gesner, M.D., D.F.G.S., who gave to America kerosene for a lighting fuel. The grave of Dr. Gesner has been graced by a tall black granite monument, erected as a token of appreciation of his important contribution to the oil industry.

Briefly, the inscription on the stone tells of Dr. Gesner's work. It reads: "Abraham Gesner, M.D., D.F.G.S. 'Geologist.' 'Born at Cornwallis, Nova Scotia, May 2, 1797. 'Died at Halifax, April 29, 1864. 'His treatise on the Geology and Mineralogy of Nova Scotia, 1836, was one of the earliest works dealing with those subjects in this province and about 1852 he was American inventor of the process of kerosene.'"

"Born at Cornwallis, Nova Scotia, May 2, 1797. 'Died at Halifax, April 29, 1864. 'His treatise on the Geology and Mineralogy of Nova Scotia, 1836, was one of the earliest works dealing with those subjects in this province and about 1852 he was American inventor of the process of kerosene.'"

CRAWLING ABOUT WITH LUMBAGO

Here is some useful information for anyone troubled with that uncomfortable ailment, lumbago. It is written by—

"I was suffering from lumbago. During wet weather, I could only turn in bed with great effort and pain. I had been suffering from it for several years. I had had both lumbago and sciatica, and crawled about for a fortnight, feeling very sorry for myself and looking 100 instead of 35. Some day I was told that Dr. J. C. Krusen kept the bloodstream pure and vigorous by promoting a clockwise regularity in the organs of circulation. I did, and I have taken them ever since, with the result that I hardly ever get lumbago these days." (Mrs.) J. C. Krusen.

It is just as Krusen is so effective in keeping lumbago at bay? I suppose because it goes right down to the cause, which is an impure blood. Dr. J. C. Krusen keeps the bloodstream pure and vigorous by promoting a clockwise regularity in the organs of circulation.

Largely Miscalculations
Collisions Often Result From Driving Too Near Other Car

A wise driver gives the cars he meets as much room as he reasonably can. He does not run hub-caps with people whose driving experience he knows nothing about. The authorities agree that the highway is probably getting farther information about so-called head-on collisions and ascertain how many of them were side-swiped or rear-ended. The average of a few inches on the part of one car or the other. And the length of experience of the different drivers. The record shows that the most common cause of collisions is not to put the blame on green drivers, but, perhaps, to build up a body of statistics which might teach experienced drivers the danger of assuming that when they are hitting 60 miles an hour every car they meet is able to share the road with them to a margin of a few inches. Just a little mistake in the other car may cause a sudden in-swing of a few inches—another head-on collision makes news on the front pages—Toronto Star.

Reception Almost Too Perfect
Sicilian Radio Assailed That By Broadcasting His Description

A startling coincidence had amazing consequences. A man walked in to a Charlotte, North Carolina, radio store, carrying a radio which was fitted with a short wave transmitter and an arm. He wanted to sell it. He put the set down and started to "tune it up" to give the radio dealer an idea of its splendid reception. The reception was perfect—so perfect, in fact, that the man caught his breath, expected out to the street and had not been seen since. For the broadcast was a police description of the receiving set which had been stolen only a short time before. Within a few minutes the radio was returned to the owner.

Just Wind It Up
A clockwork automobile that runs 40 miles on a winding has been introduced by the Japanese. It sells for 400 rupees (\$160). The inventor, brought to Calcutta, India, secretly, worried British dealers who already are suffering from Japanese competition.

Homage Greeley, noted American journalist, always intimated the word 'disaster' was popular. One word and one of his reporters in another city. "Are there any news?"

The reporter wired back, "Not a word." The reporter wired back, "Not a word."

Doing away with the need of a daily inspection of a line, a new machine has been invented by a Canadian inventor detects and charts any sudden depression in a railway track while a train is passing over it.

Cotton spinning mills in Belgium are speeding up production.

Europe is a little smaller in area than the United States and Alaska but it has more than four times as many people.

Common sense would be all right if only it were a little more common.

Farmer—"No, I wouldn't think of chargin' ye for the cider. That'd be beetlegg'in—an', praise the Lord, I ain't come to' that yet. The peck o' potatoes'll be five dollars.

16 out of every 100 women who report to us say that they are benefited by this medicine. Buy a bottle from your druggist today . . . and watch the results.

"No, no, of course, he won't."
"Then," asked the lad in a burst of
irritability, "why do you want 'im
ad?"

What's Become of all The Homely Women?

Women simply aren't homely any more. You meet plain women, yes...but their smart, trim air is the envy of many who are only beautiful.

In the old days, when a girl gave promise of becoming "hopelessly plain," she was frankly informed of the fact to save her from hurt pride in later years. She remained frumpy and tried to convince herself that she didn't care!

Not today!

Advertising has played a remarkable part in making every woman attractive.

It has taught her to use the beauty and charm that are her heritage, regardless of the shape of her features, her teeth, her hair, her hands, her complexion, her clothes, and even her erect, athletic figure have been "brought out" by methods constantly before her in advertising.

Read the advertisements. They hold secrets of beauty and style that were denied the women of yesterday

HEALTH FAD SKEPTICS

The subject of how to live long is always of interest, which perhaps accounts for the eagerness of the average mortal to seize upon various methods which are recommended for promoting health and longevity, such as doing call, exercise and the like.

In spite of all the propaganda on the subject, however, there are many who are skeptical regarding the real benefits of strenuous physical activity. One of these wrote a letter to the press, pointing out that a

famed athletic and originator of the daily dozen, died at the age of 65, while, he the writer, had never taken any kind of exercise to speak of and was still in excellent health although a great-grandfather. He added that "the longest-lived people are the physically lazy but mentally alert."

Commenting on the letter, a well-known writer declares that several years ago he included a vigorous health program, including vegetarianism and cold baths and the daily dozen, with this result: "Acute indigestion led to the abandonment of veget-

arianism on the doctor's orders. Another doctor recommended discontinuance of cold baths. The daily dozen are still pursued, but faith in them has been shaken by the untimely death of their inventor."

Still we may find many who swear by health fads and feel that their lives have been saved thereby. As the proverb has it, "What is food for some is black poison for others."

He is no friend that eats his own by himself and mine will like me. The unluckiest man in the world is a seafarer man with lockjaw.

The Gleichen Flour Mill

Beau Ideal Flour, milled by the Gleichen Flour Mill, is a straight grade and consequently has higher protein contents and greater food value than first patent flour.

It has a slight creamy color when first ground but becomes perfectly white in a month or two as it bleaches naturally in the bag.

Keep a few months supply of Beau Ideal on hand and you will always be sure of having a well matured flour of the very best quality in your home.

A meeting of the Curling Club will be held next Tuesday evening, Nov. 7, at 8 p.m. in T. H. Beech's store. All interested in curling are welcome.

The death of Mrs. Elizabeth Pate, wife of Rev. John Pate formerly of Gleichen, is reported by Rev. Simpson, Nov. 1, 1933. Only a brief announcement of her passing has been received. Mrs. Pate with her husband lived in Gleichen some eight or ten years ago. Mr. Pate at that time had charge of the United Church.

A great crowd turned out to greet the "Royal Scot," which was en route east. The train did not stop but went through slowly so that the crowd was able to get a fairly good look at it. The most marvelous and noticeable part of the train as it rolled past was the lack of noise and vibration, giving the impression that it had automobile tires on the wheels. The momentary glimpse of the interior of the cars revealed the magnificent manner in which they are furnished.

Great Scott read that: The Call, nine months ago—stated: "Expert Reports School is Safe for Three Years With Repairs." Have we already forgotten the howl that went up from the local citizens when big cracks appeared in the walls and the settling of the ground floor. Perhaps that is the reason most people take a look around every night before retiring and in the morning when they arise!

The Canadian Pacific Express Co. have put another rate reduction into effect and it will pay you to consult the station agent when sending your Christmas presents away this year. Packages up to one pound in weight will be called for, carried to destination and delivered to consignees anywhere in Canada for only 15 cents, with correspondingly low rates for shipments up to fifteen pounds, increasing slightly with each pound. Receipts are given and taken with every shipment, delivery can be proven and the receipt given includes protection up to fifty dollars without any extra charge. Ship by express for safety, economy and service.

There are some things that must be done in a hurry, or not at all. Catching a flea is one of the best examples apropos to this. But as a rule, it is not easy to say, the man or woman who works deliberately accomplishes the most. The deliberate worker is the thoughtful worker, with whom the habit of system has become a second nature. Anyone may cultivate it who will take the trouble to try; and the most unsystematic, spasmodic worker will realize with amazement that it is to get through with an allotted task in half the time it formerly required, by planning it all out before entering the office, workshop or kitchen.

Floyd Johnston who some 21 years ago claimed to be S. A. Hall's store here, paid a visit to the old town one day last week renewed old acquaintances with a few of the old timers still living here. Floyd had the time of his life visiting, making himself at home and pulling jokes on those who failed to recognize him. Only two or three knew him, but after revealing his identity and talking to him for a few minutes, he was the same Floyd Johnston, who was always glad to see me in the store. He will also be remembered as a star hockey player on the forward line of the Gleichen team, at the time a league existed between Brooks, Banff, St. Albans and Gleichen. Mr. Johnston is now located in Cornwall, Ont., is married and is the father of two fine children.

Wires and pipe lines will ultimately make the coal car obsolete, according to a prediction made by a professor of an institute of technology. Wires will carry electric current and pipe lines will carry oil to the great industry for power and heating purposes, he declares. This transition has already made great strides, not only in industrial plants but in homes as well, where coal stoves and furnaces are being rapidly superseded by more modern heating equipment. Oil-burner burners, electric stoves and other products of present-day engineering skill are making the coal stoves obsolete. This prediction is supported by other authorities, who point out that the newer devices are conducive to health through automatic maintenance of desired temperatures in the home, besides eliminating the coal dust, soot and other noxious which accompany the use of coal in its crude state. Thus applied science is bringing economy and efficiency to industry, and domestic comfort and health to the home.

Sky Line Hiking in the Rockies

Organized trail hiking in the Canadian Rockies will be inaugurated for the coming year by a hike slated to start at Lake Louise and end at Banff. The increasing interest in being taken in trail hiking in the Canadian Rockies, and a committee consisting chiefly of experienced members of the Trail Riders of the Canadian Rockies and the Alpine Club of Canada, has undertaken the organization of a new order called the Sky Line Trail Hikers. The inaugural hike will start this summer on August 4th from Lake Louise and tramp over the Baldyknock through Paradise Valley and over Sentinel Pass to Moraine Lake, where the first night's camp will be made. On Saturday, August 5th, the party will hike from Moraine Lake over Waputika and Capitan Passes and will have the thrill of crossing two glaciers before arriving

at Lake O'Hara. On Sunday the hikers will be able to take in the magnificent scenery around Lake O'Hara, Lake Ouse, and Mount O'Hara, and members of the party will be able to enjoy the excellent fishing in Lake O'Hara. The hike will be held on Monday, August 6th, after which the one of the finest and most beautiful of holiday outings.

catch the evening train back to Lake Louise.

The magnificent scenery of the Canadian Rockies and the pure

ramenities made by the Canadian Pacific Railway make this

one of the finest and most beautiful of holiday outings.
